Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The invention relates to a process of preparing ω -alkyl halide nitrile or ω -halogen carboxylic acid. The process comprises: reaction of malonic acid diester or cyanoacetic acid ester with α, ω -dihalogen alkane. The process is conducted in the presence of one or more alkali carbonates and a phase transfer catalyst with constant removal of water formed during the reaction. The closest prior art is US Patent No. 6,462,224 B2 to Harthun et al. US Patent `224 teach a process of preparing carboxylic acid diesters from malonic esters. The process described in this application of preparing the nitrile and carboxylic acid compounds using α, ω -dihalogen wherein the halogen atoms are separated by at least 3-carbon atoms is not taught or suggested by the prior art.
